# Keyed Removable Mullions

Mullions are close to invisible when installed

# Keyed Removable Mullions For Aluminum Doors

Standard aluminum pairs of doors leak air and water.

Traditional removable mullions are unsightly and do not fix air and water infiltration.

## INTRODUCING GREENFIELD PRODUCTS KEYED REMOVABLE MULLIONS

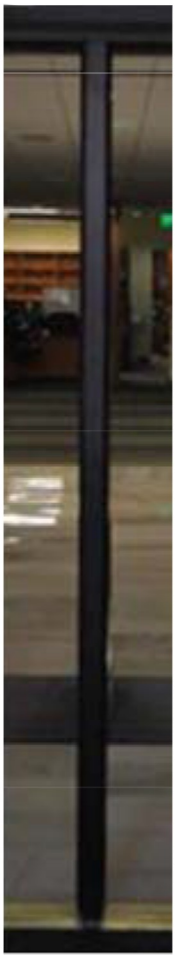
Unlike any other, our removable mullion provides optimal efficiency by creating an element barrier all around the door. The Greenfield Products Removable Mullion blends with the door frame to create the most visually appealing mullion available. Coming soon in thermally improved.

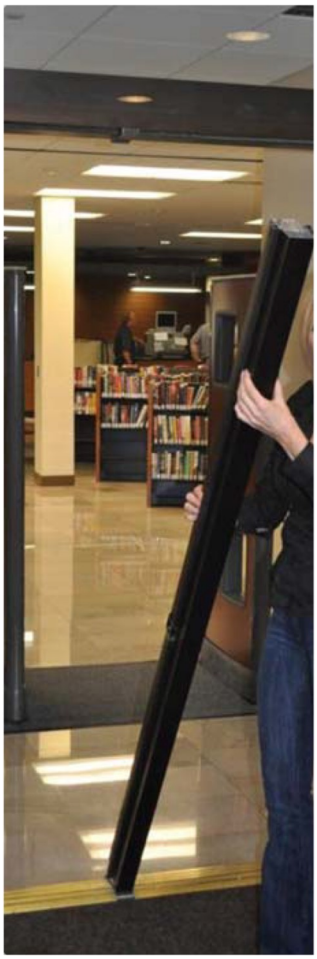
MADE IN USA

Price increase disclaimer - prices subject to change without notice, see local representative or manufacturer for current prices.

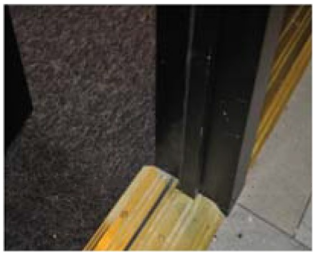
# Clean Simple Effective

Having the **mullion tube** positioned between the single doors eliminate air flow while serving as an element barrier





The **latch plate** affixed to the door frame retains the mullion top



The **base plate** is attached within the thresholds to accept the mullion tube bottom

The locking mechanism is housed with in the mullion cavity to shield it from debris and unauthorized tampering.

**Works with all major commercial storefront systems.**
**Available in 1 3/4” and 2” by 84” and 96”.**
**Custom colors are available**
